Cycling is only white coded in so far as it is high IQ, but IQ inversely correlates with testosterone — so it's acceptable that it's a white coded, high iq, low T activity.

Long distance endurance cardio also stimulates estradiol production. So there's that.

IQ issue. Gulf countries means Arabs. Generally same IQ as southern Europe (low-mid 90s).

Same thing you see in Tunisia and Algeria, they have quite a bit of Euro admixture.

Sub-Saharan Muslim countries are full of violence for obvious reasons... Iraq is full of Kurds and Dick Cheney's wars so can't really blame them.

Anyway, point is nature is more important than religion. Europe is Christian and safe, Sub-Saharan Africa is Christian and unsafe.
